

SPANISH TRANSLATION OF POPULAR FOOD NAMES - FREE VOCABULARY GUIDE

I was once told that if you want to be a real Chef, you should not let anyone buy the ingredients of your creations for you. Because the plate is your canvas, your paints will be your ingredients, your knives will be your brushes, and those who will buy your works of art will be your guests. And if there is a golden rule when cooking, it is that the ingredients must be fresh and of good quality, that's where the local market comes in, and the ritual begins: see, smell, touch and taste! Or so you thought, until you run into a barrier: language.

Spanish has become an increasingly common language and present in everyone's life, whether you find yourself in a market with Latinos, or you're living in a Spanish-speaking country for a while. The food in Spanish sometimes has names that may sound or look similar to English, but other times they won't resemble it at all, or their pronunciation will change to almost become a new word.

If you work in a restaurant, it's important to know the names of common foods in both English and Spanish. This way, you can communicate with your customers and coworkers more effectively. But fear not, we've brought for you a few lists of food in Spanish, so you won't freeze up again thinking "how do you say carrot in Spanish?" the next time you find yourself shopping or at the restaurant.

Now, if you're ready to know things like what's comino in Español, here are some essential food terms to know:

Meats

When you are shopping or preparing a recipe, you create this mental list that you cross off. Today will be the same and for our first food list in Spanish we will start with meats, that almost fundamental part of any dish, especially in Latin cuisine where you can't have arroz con pollo without pollo (in case you were wondering what's chicken in Spanish, this would be it).

Sauces

I love food in Spanish, English, and any other language you can think of. Something I don't love is a dish that could have been perfect and wasn't, and a poorly prepared sauce can ruin any dish. On the other hand, if it is a sauce that is made with the right thickness, color, aroma and flavor, that service will be on a level of gods. If you are reading recipes in Spanish language, and you don't want to fail when preparing your sauces, take note:

Fruits & Vegetables

Since humans have been human, there have always been discussions about the differences in the classification between [vegetables](#) and [fruits](#) (don't get me started on tomatoes). The truth of the matter is that they are the standard-bearers of the contours and are responsible for 80% of the flavor they bring to the final result of the recipes. If you want to know the name of this food in Spanish, they are:

Spanish	English
Fruta	Fruit
Verdura, hortaliza	Vegetable
Tubérculo	Tuber
Ají	Chili
Ajo	Garlic
Cilantro	Cilantro

Spices

Recipes in Spanish and English share something, that ace up their sleeve... Spices. They give that nuance, that unexpected touch that surprises the taste buds. Now, you may be wondering: How do you say spices in Spanish? The answer is “Especias” (never “Especies”, which means Species). But if you’re looking for something more specific, don’t miss this list:

Spanish	English
Azafrán	Saffron
