

SPANISH VOCABULARY FOR THE EMERGENCY ROOM

SPANISH VOCABULARY FOR THE EMERGENCY ROOM

Healthcare workers are in constant contact with hundreds upon hundreds of people every day, people from different ethnicities and from all around the world, and Spanish being one of the most spoken languages in the world they will encounter lots of Spanish speakers that may or may not know how to speak English.

Knowing the most used terms in the Emergency Room (ER) in Spanish is important for delivering better care for patients. Being a healthcare worker also means being the source of information, support, knowledge, and security for the person in need. Being able to communicate successfully with a patient and their family is the key for them to feel protected, secure, supported, and aware of the situation. That is a major part of the job for healthcare workers. To extend your knowledge after this article, read here for a longer [list of medical Spanish terms](#).

So today we bring you this list with the most useful terms for healthcare workers in the emergency room. For follow-up reading, be sure to check out [Spanish for EMTs](#).
